Preset manual is used to record and recall custom white balance settings for shooting under mixed lighting or to compensate for light sources with a strong color cast. The camera can store up to six values for preset manual white balance in presets d-1 through d-6. Two methods are available for setting preset manual white balance: Direct ...

Preset Manual

You use this setting with a white or gray card to get perfect color matching. The D700 can recall five settings: just hold "WB" and spin the front knob after choosing PRE with the rear knob. You need to use menus, explained later, to save the five settings. I never use an actual card.

Nikon D700 Top Panel - Ken Rockwell

I've shot, for a number of years, in a natatorium that has a mixture of filtered sunlight, sodium-vapor, and fluorescent lighting. My back-up body, D3200, nails the preset manual white balance every time (with either the 18% gray card, a white card, or just pointing it at a white wall). But the D7100 struggles to get it correct.
