### EnLighting: An Indoor Visible Light Communication System based on Networked Light Bulbs

Visible light communication is a data communications variant which uses visible light between 400 and 800 THz. VLC is a subset of optical wireless communications technologies. The technology uses fluorescent lamps to transmit signals at 10 kbit/s, or LEDs for up to 500 Mbit/s over short distances. Systems such as RONJA can transmit at full Ethernet speed over distances of 1-2 kilometres. Specially designed electronic devices generally containing a photodiode receive signals from light ...
