Gabriela Albandes de Souza. At first sight, anthropology and space exploration may seem to be two completely different fields with nothing or very little in common. When one thinks about space exploration, the most common associations are with disciplines such as engineering, physics, medicine, robotics, IT, and others related to the technology required for the endeavour and for keeping humans alive.

### Anthropology of Outer Space - InovaSpace

The study of space and place as distinct dimensions of culture apart from ethnographic accounts has since the 1990s spawned a number of areas of anthropological research. Space is often defined by an abstract scientific, mathematical, or measurable conception while place refers to the elaborated cultural meanings people invest in or attach to a specific site or locale.

### Space and Place - Anthropology - Oxford Bibliographies

We will question conventional ideas of space and place, drawing on a range of anthropological perspectives. This introductory course in the anthropology of space is interdisciplinary and ranges beyond Social Anthropology to include theoretical aspects of cultural geography, psychology, philosophy, art, architectural history and interior design.

These meetings led to the publication of the 1975 book "Cultures Beyond the Earth: The Role of Anthropology in Outer Space." In the 1980s, anthropologist Ben Finney turned his eye to space. He combined his experience in the U.S. Navy and the aerospace industry with his anthropological research on how Polynesian people could have crossed the Pacific Ocean.

### Archaeoastronomy and Other Ways to Study Space Culture

Abstract. Abstract This review describes some recent, unexpected findings concerning variation in spatial language across cultures, and places them in the context of the general anthropology of space on the one hand, and theories of spatial cognition in the cognitive sciences on the other. There has been much concern with the symbolism of space in anthropological writings, but little on concepts of space in practical activities.
